

IID or never

- Purpose: converting a list of IDs into other types of public database IDs.
- Input: a list of identifiers (14 types of identifier available)

## Provide your identifiers

Copy/paste or ID list from a file (e.g. table)

## Copy/paste your identifiers

IDs must be separated by spaces into the form field, for example: P31946 P62258

## Select type/source of identifier of your list

Please see example of IDs in help section

## Target type of IDs

## Target type of IDs you would like to map to

☐ Select/Unselect all

- ☐ neXtProt ID (e.g. NX\_P31946)
- ☐ Uniprot accession number (e.g. P31946)
- ☐ Uniprot ID (e.g. 14338\_HUMAN)
- ☐ Entrez gene ID (e.g. 7529)
- ☐ RefSeq (NCBI) protein (e.g. NP\_003395.1)
- ☐ GI (NCBI GI number) ID assigned to each sequence record processed by NCBI (e.g. 21328448)
- ☐ Protein DataBank ID (e.g. 2BR9:A)
- ☐ GOterms (Gene Ontology) ID (e.g. GO:0070062)
- ☐ Protein Information Resource ID (e.g. S34755)
- ☐ OMIM (Online Mendelian Inheritance in Man database) ID (e.g. 601289)
- ☐ Unigene ID (e.g. Hs.643544)
- ☐ Ensembl gene ID (e.g. ENSG00000166913)
- ☐ Ensembl transcript ID (e.g. ENST00000353703)

# ID Converter

- Purpose: converting a list of IDs into other types of public database IDs.
- Input: a list of identifiers (14 types of identifier available)

The screenshot displays the 'ID Converter' web interface. The main panel is titled 'ID Converter convert public database identifiers (Homo sapiens only for now) (Galaxy Version 0.1.0)'. It features a 'Provide your identifiers' section with a text input field and a dropdown menu. Below this is a 'Select type/source of identifier of your list' section with a dropdown menu. The 'Target type of IDs' section is expanded, showing a list of 14 target identifiers with checkboxes. To the right, a 'History' panel shows a search bar and a list of three items, each with a title, date, and size, and icons for viewing, editing, and deleting.

**ID Converter convert public database identifiers (Homo sapiens only for now) (Galaxy Version 0.1.0)**

**Provide your identifiers**

Copy/paste your identifiers

Copy/paste or ID list from a file (e.g. table)

**Copy/paste your identifiers**

IDs must be separated by spaces into the form field, for example: P31946 P62258

**Select type/source of identifier of your list**

Uniprot accession number (e.g. P31946)

Please see example of IDs in help section

**Target type of IDs**

Target type of IDs you would like to map to

☐ Select/Unselect all

- ☐ neXtProt ID (e.g. NX\_P31946)
